

## Maryland Environmental Disclosure Label

### Electricity Supplied from January 1, 2017 to December 31, 2017

Power plants can generate electricity from a number of different fuel sources, resulting in different emissions that impact the environment. Champion will report fuel sources and emissions to customers twice a year, allowing you to compare this electricity product with electricity products offered by other electricity suppliers.

Champion is a member of the PJM regional transmission organization that coordinates the movement of wholesale electricity in all or parts of 13 states and the District of Columbia. The standardized environmental data shown below are regional averages only and was gathered by the PJM Generation Attribute Tracking System.
