

INDEX RATE

LEVERAGE MARKET MOVEMENTS FOR MAXIMUM GAIN

For those with a tight grasp on electricity market movements and higher risk tolerance, index rate plans offer the chance to pursue market-based opportunity with no risk premiums. They also offer maximum flexibility—allowing you to switch to another plan type when market conditions change.

You pay for what you use when you use it—nothing more, nothing less. If you're ready to become an active market participant to give your organization a competitive advantage, an index rate plan is for you.

BEST SUITED FOR COMPANIES THAT:

- Have the flexibility to quickly adjust energy usage up or down
- Can pass costs on directly to their customers
- Leverage electricity purchasing as a competitive advantage
- Follow natural gas and power market movements closely

PRICE FLUCTUATION

LOW HIGH

RISK TOLERANCE

LOW HIGH

INVOLVEMENT LEVEL

LOW HIGH

INDEX RATE PRODUCT SUMMARY

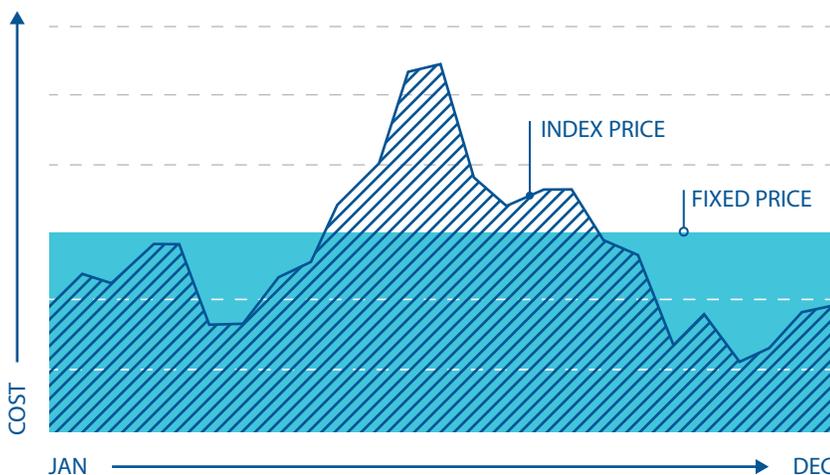

Rate varies on the market index, which changes regularly

Provides opportunity for high upside, but risks significant downside

Offer maximum flexibility and low risk premiums

Requires significant knowledge of power markets

INDEX VS. FIXED PRICE
